

INGENIX[®]

Faciledi[®] In-Stream Validation System for Payers

The January 1, 2012 deadline for complying with HIPAA 5010 transaction standards leaves little time to identify, design, test, and launch the new systems and protocols required for a smooth transition. Complying now can help improve efficiencies in revenue and payment cycle management while protecting against operational bottlenecks that could damage trading partner relationships.

Ingenix Faciledi[®] is an in-stream HIPAA validation system that determines whether X12 transactions comply with 5010 and 4010A1 standards, as well as specific payer rules. And, as a flexible rules engine, it allows you to route transactions as needed. Faciledi enables health plans to:

- Validate transactions for compliance to HIPAA 5010 and 4010A1 implementation guides
- Validate transactions to WEDI SNIP type 7
- Customize business rules and edits for transaction-by-transaction routing and processing
- Process transactions quickly and accurately
- Reduce administrative costs with flexible deployment options

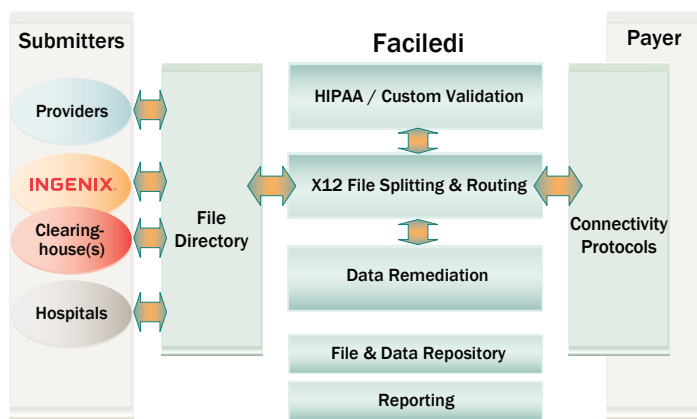

Achieve 5010 compliance today

As with any transition, the shift to HIPAA 5010 is bound to be bumpy industrywide. Non-compliant transactions will result in backlogs and slower adjudication rates, which threaten the bottom line, operational flow, and relationships with trading partners. Faciledi acts as an intelligent gatekeeper, directing clean transactions through your system while identifying and separating those with errors and enabling you to define how you wish to process, route, and communicate them. Faciledi validates to WEDI type 7 and against more than 500 payer companion guides, and it will accommodate the expanded ICD-10 code sets coming in 2013.

Control your transaction stream

Faciledi allows you to create and maintain a quality data stream with fast, reliable processing and minimal manual intervention while expediting responses and inquiries—no matter what your transaction volume. You get user control of the front-end environment by defining rules, policies, and edits according to your business objectives. You get control at the back end, too. Split and route transactions by provider, trading partner, even specific data elements within the transaction so that only valid transactions are processed through your operations and work processes in the way that you designate.

Get ready for 5010 today. Visit www.5010prepared.com

Faciledi is an X12 health care transaction processing and routing system that allows you to dictate how transactions should be processed.

Improve quality control

With Faciledi's extensive, customizable global-to-granular reporting capabilities, you can root out problems, identify trends, and take steps to improve shortfalls and inefficiencies. For example, want to know your top ten transaction errors? Faciledi enables you to identify and address them. The system also provides tracking and reconciliation capabilities to eliminate "black holes," as well as automated data remediation and real-time data visibility for enhanced customer support. Finally, its data and system analytics can be used for auditing and management decision making.

Key Features

Ingenix Faciledi is built on the only transaction validation engine designed specifically for health care EDI. With Faciledi, you'll comply with HIPAA 5010, get a keener grasp of your entire

transaction process, and strengthen your operational effectiveness through greater:

- Flexibility—Configure editing down to the transaction level, then sort and route by transaction source, type, data, destination, or criteria of your choosing
- Confidence—Know that all HIPAA 5010 and 4010A1 transactions are validated to all seven WEDI types and against 70+ relevant code sets
- Credibility—Adjudicate claims quickly and accurately enough to meet—or even exceed—trading partners' expectations, even in the face of the massive transition to HIPAA 5010
- Scalability—Plow through any level of transaction volume, from hundreds to millions a day
- Visibility—Get detailed submitter reporting for quality improvement, and track and reconcile to eliminate "black holes"

Proven, Trusted Processing

Used by some of the nation's largest payers, Ingenix Faciledi helps reduce administrative costs and accurately validates and routes over 1 billion transactions annually.

We have experience in big transitions, too. Ingenix led the way to HIPAA 4010 compliance with Ingenix Claredi® Classic 4010 pre-production testing and certification. Faciledi in-stream validation and routing system brings that expertise to daily production.

- Deployment options—Implement Faciledi virtually or via a physical server installation
- Value—Manage administrative costs with a lower total cost of ownership

Why Ingenix?

Our track record speaks for itself. More than 500,000 physicians, 3,000 hospitals, and 1,200 payers trust Ingenix compliance and coding solutions. Our industry experts have been at the forefront of coding and transaction standards, payment, and reimbursement technologies for more than 25 years. That experience can help your organization navigate the transition to 5010 with ease.

How much confidence do we have in our solutions? Enough to use them ourselves. We use Faciledi and Claredi Classic to test, validate, and route more than 1 million transactions every day.

Learn how Faciledi can help your organization process 5010 transactions and reduce administrative costs. Call (800) 765-6034 or email ingenuity@ingenix.com.
