Review Data by Provider

Analyze Provider and Network Performance

Analytic Business Solutions

- Primary Care Physician Analysis
- Specialty Physician Analysis
- Facility Performance Analysis
- Employer Reporting
- Health Risk Assessment
- Care Management Analysis
- Process Outcomes Measures
- Pharmacy Analysis
- Radiology Analysis

Value Added Analytic Methodologies

- Episode Treatment Groups[®]
- Episode Risk Groups[®]
- EBM Connect[®]
- Responsible Provider Assignment
- Primary Care Physician Assignment
- Type of Service and Specialty Categorizations

Executive Summary

Impact Intelligence[™] combines leading-edge decision support technology with proven analytic methodologies—resulting in reporting and analysis with greater depth, flexibility, and power. This solution helps:

- Boost the quality and performance of your health plan
- Enhance the health and well-being of your members
- Optimize your provider network
- Promote the health plan and employer relationship—value, efficiency, and quality

Overview

Information can only make an impact when it reaches the point of decision in a concise, accessible format and engages the decision maker. Impact Intelligence is designed to facilitate information sharing and collaboration across today's extended health care enterprise—empowering executives, physicians, analysts, case managers, and members to effect change.

FLEXIBILITY

Impact Intelligence offers your organization the flexibility to analyze and dissect data by whatever dimension or measure you choose. Customized report views allow individual users to focus on the data they need most.

SECURITY

Impact Intelligence is designed with the highest concern for security and can be easily integrated into your organization's existing HIPAA compliance program. Role-based authorization, audit logs, and SSL encryption are each critical components of the security infrastructure.

EASY TO USE

Impact Intelligence delivers complex information through an intuitive, web-native interface that places the greatest value on ease of use for your team. The data is displayed to highlight key opportunities for change and maximize the impact on the user—whether the user is a CEO, a network physician, health care data analyst, or an employer group.

Functional Support

Impact Intelligence includes specific analytic methodologies designed to support the business needs of multiple functions within a health care organization including:

- Provider Network Management
- Physician Profiling and Quality Improvement
- Employer Group Reporting Initiatives
- Benefit Design and Actuarial Planning
- Disease Management Program Development
- Case Management and Utilization Trends
- Plan Management and Pricing
- Consumer-Driven Health Care Initiatives

Key Features

■ DATA MART

Impact Intelligence is a robust, flexible data mart application that can be integrated as part of an existing reporting and analysis system or serve as a complete, stand-alone decision support solution.

■ MULTIDIMENSIONAL ANALYSIS

SERVICES CUBES

Support in-depth, interactive analysis of the underlying factors that drive financial trends and utilization performance using a pre-aggregated, multidimensional structure. Users with varying technical skills can execute complex queries easily through our intuitive interface.

■ GUIDED ANALYTIC REPORTS

Provide entry points into analysis of data that support a wide range of health plan management functions. Powerful filters enable almost unlimited flexibility in report content, and multiple output formats enhance communication and collaboration across the enterprise.

■ CLAIM LEVEL DRILL-DOWN FUNCTIONALITY

Impact Intelligence expands an individual user's analytic powers by delivering access to the specific underlying claims associated with summary performance measures.

■ REPORT SCHEDULER

Schedule selected reports to run at stipulated times or with user-specified frequency, save them to a variety of formats, and route them directly to designated recipients.

■ SOFTWARE LICENSING OPTIONS

License the Impact Intelligence processing engine alone and integrate it with your existing business intelligence systems.

Add the Impact Intelligence Reporting System license to deliver a comprehensive, end-to-end reporting and analysis solution.

Impact Intelligence is not information for information's sake. It is information to drive improvement.

Latest Innovations

The technology behind Impact Intelligence disseminates information rapidly in formats tailored to the needs of specific business users.

User-Defined Peer Groups

Fine tune risk-adjusted provider performance measurement by configuring Peer Definitions driven by provider-specific attributes such as specialty, group affiliation, geographic area, specific ETG selection, or other custom criteria.

Flexible Provider Attribution Methodology

Assign provider responsibility to episodes of care, select attribution rules appropriate for specific peer group analyses, and vary criteria by provider type or group affiliation.

Evidence-Based Medicine Guidelines

Compare provider compliance with hundreds of evidence-based guideline measures covering more than 30 conditions and nearly 400 components of care.

Detect Cost Utilization and Quality Trends

Identify key benefit opportunities for key employer groups.

Patient Satisfaction Data

Integrate patient satisfaction data and HRA results into the Impact Intelligence data mart to enhance the scope and impact of routine provider profiling and management reports.
