

INGENIX[®]

Impact Pro™ for Care Management

Higher quality of care. Healthier members. Lower costs. Impact Pro makes all three possible.

Executive Summary

Impact Pro™ is a multi-dimensional, episode-based predictive modeling and care management analytics solution designed to help care management teams utilize clinical, risk, and administrative member profile information to target health care services to those members who will benefit most. Using Impact Pro, care management teams can:

- Discover new intervention program opportunities for members
- Assess the efficacy and quality of current intervention programs
- Understand the issues driving each member's use of health care resources

Overview

Care managers use Impact Pro to easily identify, profile, and stratify plan members into actionable groups based on one of the industry's leading predictive modeling systems.

Impact Pro helps to determine which members are in need of a specialized intervention program and which intervention programs could have the most impact on the quality of members' health.

Impact Opportunities

Enhance cost savings by identifying members who would derive the most value from current managed care programs using customizable care profiles and evidence-based guidelines targeted to specific member populations and resources.

Program Analysis

Evaluate member populations enrolled in current programs and identify new program opportunities for those populations. Demonstrate increased cost savings over time and measure effectiveness by gauging both quality of care and health care outcomes.

View Immediate Intervention Opportunities for Each Member

The screenshot shows the 'Member Information' and 'Care Opportunities' sections of the Impact Pro interface. The member's ID is 0013540108, a 68-year-old male. Key metrics include Future Risk Costs of \$76,045 and Future Risk Inpatient of 22.02. The primary risk factor is Neoplastic blood disease. Under 'Care Opportunities', several items are listed, such as 'CAD, no evidence of lipid testing' and 'Diabetes, no evidence of testing for microalbuminuria'.

Quickly Stratify Members

The screenshot displays the 'Impact Pro: Members List' table. It includes columns for Member ID, Episodes, Risk, Care Opportunities, Notes, Sex, Age, Months Enrolled, Future Costs, Future Risk, Inpatient, and Inpatient Stay Probability. The table lists 251 members, with the first few rows showing details for members like 9862245646 and 4962752356.

Member ID	Episodes	Risk	Care Opportunities	Notes	Sex	Age	Months Enrolled	Future Costs	Future Risk, Costs	Future Risk, Inpatient	Inpatient Stay Probability
9862245646					Male	50	12	\$203,624	84.84	32.37	90.0%
4962752356					Female	33	12	\$196,071	81.70	1.66	4.6%
0010432874					Male	58	12	\$192,468	80.20	32.37	90.0%
0016787469					Female	50	12	\$191,468	79.78	3.46	9.6%
0016191511					Male	70	12	\$165,697	69.04	32.37	90.0%
0006885637					Male	64	12	\$143,399	59.75	31.36	87.2%
9898956418					Male	61	12	\$139,919	58.30	24.15	67.1%
0006389262					Male	30	12	\$126,723	52.80	2.53	7.0%
6687399445					Male	39	12	\$125,464	52.28	1.94	5.4%
0016096661					Male	84	12	\$124,913	52.05	23.93	66.5%
0001243594					Male	62	12	\$121,397	50.58	32.37	90.0%
0011467768					Female	80	12	\$118,960	49.57	24.64	68.5%
0007436232					Male	54	12	\$112,724	46.97	20.62	57.3%
0014525172					Female	59	12	\$110,354	45.98	23.80	66.2%
0013832787					Female	81	12	\$110,036	45.85	32.37	90.0%
1524381154					Male	72	12	\$108,389	45.16	19.19	53.4%
0007541660					Female	45	12	\$104,399	43.92	14.86	41.3%
0007361612					Male	56	12	\$97,047	40.44	28.04	77.9%
0008647872					Male	57	12	\$94,392	39.33	32.37	90.0%

Early Identification

Flag members for intervention before their health becomes catastrophic using Impact Pro's advanced identification technology.

Member Profiling

Assess intervention opportunities using clinical guidelines and a comprehensive overview of a member's health including retrospective and predictable future issues which present a risk to a member's future care.

Visible Trends

Track members' progress over time using Impact Pro's ability to record historical information on a member.

Key Features

- **Risk Profile:** View member-centric profiles and forecast expenditures based on available data inputs—enrollment, medical claims, pharmacy claims, and lab results.
- **Immediate Risk:** Predict risk accurately for time horizons as short as three months.
- **Compliance with Guidelines:** Review a member, provider, or plan's compliance with evidence-based and clinically accepted guidelines.
- **Type of Service Risk:** Fully segment predicted future costs by medical category, including pharmacy.
- **Member Profile:** Access a single, unified profile of a member's historical and predicted health.
- **Filtering:** Segment and stratify member populations by a wide range of criteria including risk score, condition, and compliance with clinical guidelines.
- **Complete Drill-Down:** Analyze every level of a member population, including individual member claims.
- **Care Team:** Review a member's provider information quickly and easily.
- **Survey Results:** Integrate Health Risk Assessment results for a complete picture of each member's care history.

Additional Features

Maximize Impact Pro with the following enhancements:

- **LAB RESULTS MODULE:** Incorporate lab results data into our existing predictive model to generate unique measures of risk.
- **PHARMACY RISK GROUPS™ (PRG™) MODULE:** Generate measures of future risk based solely on pharmaceutical claims.
- **PRO ACTIVE MODULE:**
 - **CLINICAL PROFILE:** Better identify, stratify, and assess members.
 - **CLINICAL INDICATORS:** An in-depth analysis of diseases, conditions, specific co-morbidities, severity, and utilization patterns.
 - **CARE OPPORTUNITIES:** Determine gaps in care and intervention opportunities.
 - **CASE DEFINITIONS:** Categorize members based upon intervention level.

Service Options

Let our experienced team of clinical, analytical, and data professionals assist you in utilizing the outputs of Impact Pro to meet your specific business needs.
