

INGENIX CareTracker

Cut administrative costs
by automating tasks with
Ingenix CareTracker™

By providing organizations with both the technology tools and the support they need to get their EHR systems up and running, Ingenix CareTracker helps physicians create meaningful, sustained improvements within their practice.

Ingenix CareTracker is a web-based, CCHIT-certified® application fully integrated with all the operational functions of the hospital or practice. CareTracker helps hospitals and practices:

- **Protect privacy and deliver high-quality care**
- **Qualify to receive electronic health records (EHRs) stimulus reimbursement payments**
- **Save time and money by automating key functions**

“We are increasing our use of Ingenix CareTracker Services because they create value for our business,” said Maureen Connell, director of central business operations at Temple University Physicians. “In addition, our management teams work well together, giving Ingenix the ability to play an active role in our process improvement efforts, expand our access to information, and provide insight to our business challenges and risks to achieving our goals. For us, this has been a relationship that really works.”

Learn how CareTracker can help you increase your return on investment. Call (800) 765-6074 or email ingenuity@ingenix.com. Find out more at ingenix.com/caretracker.

Advanced technology and functionality

CareTracker is one of the most advanced, web-based practice management systems (PMS) and EHRs in the industry. All its interfaces are built and maintained by Ingenix and it is available with a low upfront investment and an affordable monthly subscription. Ingenix hosts the software and a central library of interfaces so you'll have instant access to the updates you need to improve coding and reimbursement.

This practice management, electronic medical record (EMR), and revenue cycle management service fuses clinical, financial, and administrative workflows together into one seamless system.

Impressive return on investment

CareTracker provides an almost immediate return on investment through administrative cost savings, improved regulatory compliance, streamlined patient-physician encounters, and performance measurement. Switching to an electronic solution can reduce paper and courier costs, free up space used to store paper charts, and eliminate ghost charts. Automatic reminders notify patients of upcoming appointments, and complete and accurate documentation of each patient encounter eliminates the need to dictate and review transcripts, which reduces liability and malpractice costs.

Ingenix CareTracker ROI Case Study		
Year	2001	2009
System	Medical Manager	CareTracker
FTE/Provider Ratio	4.1 Providers per FTE	10.6 Providers per FTE
Pay at First Pass %	75%	92%
Avg Days in AR	42	27
Avg % AR>90	17%	8.5%

Qualify for the EHR stimulus bill incentives

CareTracker helps physicians and hospitals meet the requirements to receive reimbursements. Its CCHIT certification means that CareTracker protects privacy and gives physicians the

information they need to deliver high-quality care. It automatically generates electronic prescriptions and sends them to the appropriate pharmacy and refills can be processed 24/7. Real-time connections enable safe and secure data exchange with labs, pharmacies, hospitals, and more. CareTracker includes auto-prompting for Physician Quality Reporting Index (PQRI) and ePrescribing to facilitate a four-percent bonus from Medicare.

Safe and secure interconnectivity

With CareTracker, authorized users can log-in to their EMR and PMS from anywhere via a secure web browser. Once logged in, they can access patient records and review medications, patient history, recent orders, and test results through the system. Lab results are integrated with major laboratory information systems as well as a referring physician portal for instant access to accurate information.

Clinical enhancements

Powerful, intuitive, and easy-to-use, CareTracker is a scalable system that becomes more sophisticated as the user's experience grows. Specialty templates, medication orders, and order sets can be added to favorites; a continuous care record pulls multiple encounters together; and lab results, electronic prescribing, and claims management are available at the click of a button.

Ingenix CareTracker Customer Analysis by Specialty

Specialty	Days in AR		Percentage of Claims > 90 Days	
	MGMA Standard	Ingenix CareTracker Result	MGMA Standard	Ingenix CareTracker Result
Cardiology	38	32	20%	19%
Dermatology	32	24	10%	4%
Family Practice	35	30	16%	12%
Internal Medicine	32	14	16%	7%
OB/GYN	37	23	15%	9%

About Ingenix CareTracker

Ingenix CareTracker is a family of web-based products and services that simplify administration of physician practices and improve care by enabling physicians to spend more time with patients. Today, more than 4,000 physicians nationwide use the three Ingenix CareTracker modules together or in combination with other third-party practice management systems. Ingenix CareTracker PM provides practice management functionality that optimizes administrative workflows for physician practices while Ingenix CareTracker EMR helps clinicians enter, retrieve, and correlate patient information at the point of care. Ingenix CareTracker Services improve revenue cycle management with comprehensive billing and accounts receivable support.
